

1.	Develop a Sustainability Lens or Test for land use decision making within the context of the Regional Official Plan.
2.	Establish a process, in collaboration with the Local Municipalities, to: <ol style="list-style-type: none"> <li>a) Set annual targets for the next five years of new housing units by density type to be developed within the Built-Up Area and within the Designated Greenfield Area for each Local Municipality;</li> <li>b) Monitor annually whether the following minimum targets were attained in the previous calendar year:           <ol style="list-style-type: none"> <li>[i] 40 per cent of new housing units occurring in the Built-Up Areas, measured across the Region as a whole;</li> <li>[ii] 50 residents and jobs combined per gross hectare in the Designated Greenfield Areas, measured across the Region as a whole; and</li> <li>[iii] 200 residents and jobs combined per gross hectare within each Urban Growth Centre; and</li> </ol> </li> <li>c) Recommend to Council appropriate actions to address any significant shortfalls under b) above.</li> </ol>
3.	Adopt a minimum target of 50 per cent of medium and high density units combined within the Designated Greenfield Area of each Local Municipality.
4.	Commit to the provision of, and seek sustained funding for, a seamless, convenient and affordable (to users) public transportation system that has a level of service in terms of travel time comparable to that of driving one's private car.
5.	Develop, in collaboration with the Local Municipalities, a set of community design criteria that would promote walking/cycling and support transit services in all new residential neighbourhoods and employment areas.
6.	Require Secondary Plans to include a Community Infrastructure Plan with a strategy for its implementation.
7.	Consider the introduction of health-based guidelines for distance separation between non-compatible land uses.
8.	Replace the current Greenlands System with a Natural Heritage System that is science-based and sustainable to the impact of surrounding urban development.
9.	Commit to supporting the agricultural industry in Halton by investing in programs and infrastructure that would improve the viability, sustainability and profitability of farming in the rural areas of Halton.
10.	Require a comprehensive review of Halton's Archaeological Mater Plan every five years and establish a protocol for consulting with First Nations.

- |  |
|--|
| <p>11. Introduce a schedule showing the Mineral Aggregate Resource Areas within Halton based on latest mapping available from the Province, as modified by pre-emptive constraints, and policies that would:</p> <ul style="list-style-type: none"><li>a) Protect the integrity of the Natural Heritage System from quarry operations;</li><li>b) Require regular updates of the rehabilitation plans of existing and new quarries; and</li><li>c) Require regular on-going monitoring of impact of quarry operations on the natural and built environments.</li></ul> |
| <p>12. Introduce a schedule showing strategic employment areas intended for development beyond the planning horizon of 2031, with the provision that such areas may be brought into the Urban Areas by Amendment to the Regional Official Plan through a justification study without the need of a Comprehensive Review.</p>   |
| <p>13. Consider new policies to address the land use implication of emerging green energy and related uses.</p>  |
